with its rosts and the difficulties and inzards accompanying it, it is very far from being a very renunerative occupation. Agriculture is more certain in its rewards, and, unlike gold mining, where the few gain and the great majority get nothing, is more general in the distribution of its grains. Besides, agriculture is not inconsistent with home sobriety and civilization.

It is estimated that the number of railroad ties in present use in the United Statesare 150,000,000. A cut of 200 ties to the serie is rather above than under the average, and it therefore has required the product of 750,000 acres of well-timbered hand to furnish the supply. Railroad ties last about five years, consequently 30,000,000 ties are used annually for repairs, taking the timber from 150,000 acres. The manufacture of rolling stock disposes of the entire yield of 350,000 acres, and a fuel supply of nearly 500,000 acres more every year. It appears, then, that our railroads are stripping the country at the rate of 1,000,000 acres a year and their demands are rapidly increasing.

ond, step into christ, third, step into heaven. The astonished minister, years afterward, acknowledged his in-debtedness to that poor rustic for one of his protoundest and most comprehen-sive lessons in experimental theology.

A LHITLE girl was one day reading by the side of a sick widow's bed; and when a visitor asked the widow, to whom she was reading, who the child was, "O," she said, "she is very kind to me." "Why do you come here, my dear?" said the lady, for she found that she often
